

Non-Surgical Interventional Spine & Nerve Specialists

INTERNATIONALLY RECOGNIZED LEADER

William S. Whyte II, M.D.
Non-Surgical Spine Specialist

Dr. Whyte founded Louisiana Pain Physicians, the first practice of non-surgical interventional spine medicine in the region in 2001. He was the first fellowship trained, interventional spine specialist in the region and is one of less than 400 nationwide.

He is an internationally recognized expert on Biacuplasty™ (a thermal treatment for injured discs in the lower back) and was recently selected as the featured physician on the training video for this procedure.

PIONEER IN TECHNOLOGY AND NON-SURGICAL TREATMENT

Dr. Whyte is setting the standard in patient care. He is the region's leader in Spinal Cord Stimulation and Balloon Kyphoplasty™, a treatment option to relieve pain associated with fractures of the spine. He was the first physician in Louisiana to perform Nucleoplasty™ and DeKompressor™ procedures for herniated discs in the lumbar spine, and the first in the southeast to perform this procedure in the cervical spine.

Stephen W. Wheat, M.D.
Nerve, Bone & Joint Specialist

A native of Natchitoches, Louisiana, Dr. Wheat is board certified in Electrodiagnostic Medicine, Physical Medicine and Rehabilitation and Internal Medicine. His vast and extensive experience in neuromusculoskeletal medicine allows him to evaluate the presence of nerve and muscle disorders and provide tailored non-surgical therapies to address symptoms of pain.

BACK PAIN EXPERTS THE NAMES TO KNOW

**NON-SURGICAL
SPINE SPECIALISTS**
LOUISIANA PAIN PHYSICIANS

AT LOUISIANA PAIN PHYSICIANS, we are dedicated to excellence in patient care that is practical, simple and offers a high success rate—without surgery. We use a comprehensive physical assessment, test results, and the patient's specific symptoms to accurately diagnose the pain condition. A treatment plan is then tailored to each patient. Our variety of interventional treatment options are performed at our facility and often take only minutes. Patients usually go home the same day.

Enjoy Life Again! That's exactly what patients of Louisiana Pain Physicians do. We use research, technology and our advanced training to heal spine and nerve related pain without surgery.

Are you one of an estimated 1.5 million Americans who will experience back pain this year? If you suffer from painful spinal disorders, back and neck pain, or joint pain, you don't have to be a prisoner to your pain because you fear the permanent nature of surgery.

Doctors used to treat pain as a symptom—now we know more. We know pain is the problem. Pain can affect our emotions, livelihood and the people around us. Drugs, physical therapy and surgery too often do not stop the pain.

The highly skilled and trained physicians at Louisiana Pain Physicians employ the latest in technology to offer you an important first choice in treatment options. Their precise diagnosis and expertise are helping thousands enjoy life again without sensitive surgeries and hospital stays, long recovery time or physical impairment induced by high dose narcotics.

*You don't have to live with your pain.
You have a choice, a first choice.*
